Subject: % Unimpaired Flow over time
[Historical Percent Unimpaired Flow.xlsx](#)
(embedded image)

Hey Team

Bruce sent me some spreadsheets and I massaged it to see what is the historical % unimpaired outflow from the delta. I mostly did this because I feel like we should mention anti-deg and "existing uses" in our comments and I was curious what % unimpaired flow was existing on the date pegged for "existing uses" - that particular percent unimpaired flow is 64%.

food for thought

--Valentina

Definition of an existing use from clean water network: The uses (ex.'s swimming, fishing, or support of aquatic life) that the waterway was clean enough to support on or after November 28, 1975. These uses must be protected by the state's water quality standards.
